EXPERIENCE

Distin-Gui

Software Engineer (Frontend Focused)

August 2021 – Present
Beirut, Lebanon (Remote)

- Developed various web applications for **small independent** and **large corporate clients**
- Assisted in planning the architectures of our projects' frontends
- Increased team productivity by 30%** by encouraging coding principles like pair programming

GTonics

Software Developer Intern

May 2022 – July 2022
Lebanon

- Released an MVP **cross-platform** Flutter app with a PHP API + admin panel hosted on CPanel

PROJECTS

Instant Weather App

[Live Demo](#) — [Source](#)

- Developed a Vue.js web app that serves instant data from the *OpenWeather REST API*
- Displays live weather information of any city in over 100 countries around the world

Color Guessing Game

[Live Demo](#) — [Source](#)

- Taught tens** of people how color mixing works using RGB by creating this web mini-game
- Designed to be **very fast**, *lightweight*, and *mobile-friendly*

Mock Car Rental Website

[Live Demo](#) — [Source](#)

- Designed a car rental website with a focus on being responsive and mobile-friendly
- implemented jQuery to write more efficient JavaScript code and add page interactions easily

React Scaffold

[Source](#)

- Command line interface used to quickly create component templates for React applications; written in TypeScript
- Applies **test-driven development** with Mocha and uses **GitHub Actions** as a CI pipeline
